from the website...

Jumpgrades unique educational software adapts assessment and instruction based on child's response. As the system assesses the child, it also considers what the child needs to know, which part of the curriculum is to be taught or tested next, and how to present the material.

Access anytime, anywhere using the internet
Allows for Individualized skill practice
Content aligned to national Standards
Math and Reading to K-6

Jumpgrades Approach
Assessment test determines child's starting level
New concepts are introduced by way of an example
Children practice exercises modeled after the example
Each subsequent exercise is incrementally difficult
Smart tutorials for difficult topics

.
