neilist <littoralee@xxxxxxxxxx> writes:

It sounds like another James-Harris type situation, when Quinn Tyler Jackson claimed that a "closed list" of experts and mathematicians could not find any error in James Harris' paper on Fermat's Last Theorem, and therefore James Harris' paper must be correct.

When did Jackson ever claim this? Especially that part following "therefore".

You're a pathetic liar.

"In terms of story, this one is tops. All of the 'good' characters grow and become much more than they were when the movie began. This film celebrates friendship at it's basest level and demonstrates the triumph of good people above overwhelming odds." -- IMDB user comments are tops, at the basest level
