It sounds like another James-Harris type situation, when
Quinn Tyler
Jackson claimed that a "closed list" of experts and
mathematicians
could not find any error in James Harris' paper on Fermat's
Last
Theorem, and therefore James Harris' paper must be correct.

When did Jackson ever claim this? Especially that part following
"therefore".

You're a pathetic liar.

What I said is in this newsgroup's archives. Go dredge them up.

Right. Very convincing.

I remember Jackson's contributions. I don't recall that he **ever**
claimed that JSH's paper must be correct.

Quinn and you defend James Harris, because you LOVE James Harris.

You just love love LOVE him!

Wow. You saw through my subterfuge. I thought my adoration of JSH
was well hidden. Where did I go wrong?
