Dear all,

I have a math problem regarding the proof of the uniqueness of the solution of a certain equation. I have spent some weeks on it but have not been able to solve it. You can have a look at the problem here...

<http://rapidshare.com/files/61144188/problema.pdf>

Sorry, I have absolutely no desire to start dealing with "Rapidshare" just to look at your problem, since I'm not about to choose a "premium" or non-premium access stuff. Least of all to download a PDF. I'm sure I won't be alone in that.

If you were to post to problem here, in plain text, though, then perhaps many of us who will not deal with your rather eccentric choice of method of communication will take a look at it.
