a_plutonium <a_plutonium@xxxxxxxxxxxx> writes:

There is another advantage and a major advantage to proper typing is that I can actually read a book and type in what I am reading with the proper way to type rather than the hen-peckers who have to interrupt their eyes in reading and hen peck their typing. So proper typing allows one to do two things simultaneously whereas hen-peckers can only do one thing.

Er, is this post really a chapter in a textbook aimed at teaching AP-adics to six-year-olds? There's nothing here but some odd ruminations on typing.

If you had a real publisher, then they would provide a real editor. There are certain advantages to that.
