If they filter content, that means they look at content, which means they can be held liable for illegal content (for example movies, software, mp3s).

It's apparent you simply aren't very knowledgeable when it comes to Usenet infrastructure. There's no need for anyone to take any interest in such matters of course, but your ineffectual carping is somewhat pointless. Virtually all news servers have technical solutions to protect their users from sporges, spam and so on.
