Well, then, the German version of Excel must be superior. I cannot find any such function in my version.

Analysis Toolpak loaded?

Yes, that should be checked through the menu and the addin manager as the help for the function suggests.

The English name is 'linest' (line estimation), various examples are at <http://us.geocities.com/dsteppan/ExcelTop.html>, which in general is a very nice site for Excel (if you are not forced to use the new and ugly .NET nonsense)

.
