Think whatever you want, but you can not deny that HdB's behaviour is nothing...

If you want to convince anyone you are not simply mad, a good start would be to drop this ridiculous business of referring to yourself in the third person. Unless providing giggles is all you're really in it for.

HdB is this author *as he presents himself* in 'sci.math'. It's a role attached to the real person. Needless to say that the latter is more or less anonymous, and perhaps different, as are many in this group.

== Getting ashamed of the nonsense you've posted the last days, HdB? So you want NOW to play it like "the one posting here is a dumbass, a religious fundie and an anti-scientific weirdo, but the REAL HdB...wow, some dude he is"

Re: The modern mathematical concept of infinity is indefensible

Re: The modern mathematical concept of infinity is indefensible

Well, if that makes your boat float...

In the meantime, and in order not to feel ashamed of your rather childish and bigot ideas, why won't you BETTER stop posting them? You know, what you just posted this day alone on evolution and creation will hunt you forever here, dude.

Regards

Tonio
