I reply to the groups which were attached to this post. This chung idiot is a mental case who repeats himself like a broken record. If he isn't in a hospital, he should be. If he is, they should take away his computer privileges. He is the sort of person who would kick an injured person on the ground, or spit on an ill senior citizen. The best trick is to ignore him, and if there are enough ignores, he will finally get frustrated, and go back to his other habits, and leave all the groups alone.
