Mu <[nocowinthismu@xxxxxxxxxx](mailto:nocowinthismu@xxxxxxxxxx)> wrote nothing worth repeating in [news:1&deyafcgnsww3\\$.1178fuax9pel7.dlg@xxxxxxxxxx](mailto:news:1&deyafcgnsww3$.1178fuax9pel7.dlg@xxxxxxxxxx):

The evidence of Andrew's repeated cynical obsessive use of sock puppets is visible to anyone who looks at the headers of his posts.

There are many threads over the \_years\_ where Andrew has been invited to consider posting on-topic and to refrain from spamming. His typical responses have been to reply with cut and pastes from a meagre repertoire of biblical or religiously stylised mishmashes of his own construction. When these fail in the face of reasoned argument he cuts and runs or constructs rather poor logical fallacies. When really pressed he goes deaf and blind. Would that he would also go dumb and take up pinball.

With respect to the well being of sci.med.cardiology and other useful Usenet groups, he just doesn't give a damn.

Mu is either one of Andrew's sockpuppets or is amazingly ignorant. In either case he doesn't warrant serious consideration.
