## BRIDGE AND ROUTER CONFIGURATIONS NOC SYSTEMS SECURITY

---

This is a security incident report regarding the Internet (a public wire) traffic of Salomon Brothers, which is monitored for security/compliance.

**NOTE: THESE INCIDENTS HAVE NOT STOPPED DESPITE REPEATED SISS REPORTS!**

This report should be taken as a complaint that insufficient procedures have been put in place to ensure current and new Salomon personnel are made aware of the security issues of Internet transmissions for network device configuration files. Suggest wide-spread distribution of a memo concerning the problem. Perhaps place "no-Internet-transmission" comments in all network config files. Standard warning issued to all new networkers.

Three transmissions of live passwords to three different Salomon routers have been sent in cleartext over the Internet by Rock Transves nnn-nnnn of Internet Client Services:

### SENDER DATE ROUTER LINE PASSWORD

Rock Transves 6/27/96 09:37 bc7f7w40 [global] bs345way  
[and again on] 6/26/96 16:10 con 0 bs345way  
aux 0 bs345way  
vty 0 qwerty0

Rock Transves 6/18/96 11:27 ard7w35 [global] z23c4v5b  
trangobw1 [global] bs345way  
con 0 bs345way

**ALL OF THESE ROUTERS \*AND\* ALL ROUTERS USING THE SAME PASSWORDS  
MUST HAVE THEIR PASSWORDS CH**
