ISBN: 90-77527-03-6 – Volume 4, 2009
Aims & Scope

Frontiers in Drug Design and Discovery is a book series devoted to publishing the latest and most important advances in drug design and discovery. Eminent scientists write contributions on all areas of rational drug design and drug discovery including medicinal chemistry, in-silico drug design, combinatorial chemistry, high-throughput screening, drug targets, and structure-activity relationships. The book series should prove to be of interest to all pharmaceutical scientists involved in research in drug design and discovery. Each volume is devoted to major advances in drug design and discovery.

The book series is essential reading to all scientists involved in drug design and discovery who wish to keep abreast of rapid and important developments in the field.

The book series is available in print, online and CD editions.
