Uh huh.

That must be why you didn't complete our discussion nor answer my further questions.

>*(scroll for answers)*

>*AS A POINT, THE SHEEP AND MONKEY STUDIES HAVE ALL BEEN FLAWED IN THEIR*

>*TECHNIQUE TO MAKE ANY CORRELATIONS BETWEEN THESE EXPERIMENTS AND HUMAN*

>*EXPOSURES WITH AMALGAM. Fawks*

Your proof? Do prove they have all been flawed.

Fawks has NO proof!!#####

>*Emission of*

>

>*If two amalgams release 6 micrograms of mercury, wouldn't you think that*

>*four would double that? (duh)*

Umm. Where did the 6 micrograms come from? You made it up??

#####NO answer from Fawks#####

The FACTS are the more amalgams, the more vapors. Do you agree? Are mercury

vapors good for you??

NO answer from Fawks!#####

>>(Where does these mercury vapor come from??)

>

>*****The amalgam. (duh)

Therefore IT IS WELL KNOWN MERCURY VAPORS CAN CAUSE MERCURY POISONING.

So WHY do YOU say there is no danger??????

NO answer from Fawks#####

>(is mercury released from amalgams??)

>

>*****In trace amounts, probably.

>

No probably about it!!!! Trace amounts, as in a little dab will do ya?????

>From the abstract :

The fact that mercury can be absorbed and reach*** toxic levels**** in human tissues makes **any and all exposure**** to that element of scientific interest.

>There is adequate evidence that dental amalgam restorations, during and after placement, results in the release of Hg into the patient's body.

>(do note the word adequate, I don't see, any *not credible* *real*

>> >*convincing*

>> >*hard* *clear-cut* *significant* *substantial*

*solid**reasonable**compelling*do you?)

>(I see adequate.)

>> >

>> >(What does that mean??)

>Simply that. Instruments are now sensitive enough to measure

>traces of mercury from existing restorations. That doesn't mean that it

>is *significant*.

The word used in the abstract was ADEQUATE#####

>There is adequate evidence that dental amalgam restorations, during and after placement, results in the release of Hg into the patient's body.

That's what it means. Amalgams release Hg into the patient's body

Hg is *highly toxic*. Therefore amalgams should be banned.

You LIE Fawks, you LIE!!!!
