>*For the sake of any new readers to this newsgroup. Jan is a retired*
>*day care owner/operator, (according to her) who makes a lot of noise*
>*about amalgam toxicity.*

Incorrect.

I post the scientific proof of mercury amalgam toxicity.

<http://tinyurl.com/46pwb>

>*She is not a dentist, has no training in dentistry,*
>*and does not really understand scientific methods.*

That's a lie.

Dr Steve has NOT one single study proving amalgams to be safe, while I have lots of proof and studies that show they are NOT safe.

<http://tinyurl.com/7xq58>

>*In addition, she flat*
>*out refuses to engage in any discussion about this issue even when the*
>*specific point of discussion does not contradict her own point of view.*

Another lie.

<http://tinyurl.com/3rly6>

>*She*
>*cannot communicate much beyond pasting the words of other people to*

sci.med.dentistry: The Once A Week ATTENTION Is Filled With Lies

>responses, even when the quotes do not apply to what is being said.

See above.

>She,

>also, does not give any credit to the person from which she takes these

>quotations. Her behavior is very similar to a software program designed

> to post specific remarks to key words.

Anyone can note, Dr Steve is sour grapes because he refuses to discuss and answer my questions. He is just one of many here who can't.

<http://tinyurl.com/5ufrd>

<http://tinyurl.com/4kucc>

>Please be cautious if you choose

>to follow any advice presented by her.

I have helped others and will continue.

<http://tinyurl.com/3uezd>

>Recognize that her views do NOT reflect those of modern dentistry.

They are NOT my views, they are written by researchers, Chemists, toxicologists, DDS's and MD's.

By oedern dentistry Dr Steve means the lying beliefs of *organized dentistry and medicine* who remain in denial. Their concern is EGO and afraid of being sued for the lies down through the ages.

. Her views mirror those of dishonest people who survive by preying on the
>innocent.

Dr Steve is DISHONEST.

I have a message, and it starts with *IF*

IF you have an unanswered health problem,,,,,,,CHECK THE TEETH!

NOT by a mainstream dentist, but an Alt. dentist who KNOWS the dangers of metalin the mouth and root canals, and follows correct protocol.

I did, it saved my life

.Mercury is Poisonous.There is NO safe form of Mercury in living tissue.The mercury vapor from dental amalgam alone is a bigger source than all the other sources together.

sci.med.dentistry: The Once A Week ATTENTION Is Filled With Lies

U151 identifies mercury as a toxic waste. Mercury is also recovered from discarded products and wastes such as chlor-alkali wastes, dental amalgams, fluorescent light tubes, electronic devices, and others.

The mercury is vaporized in a retort and collected by condensation. Condensed mercury is then distilled to remove impurities.*

The Environmental Protection Agency is working to reduce the amount of mercury in the environment

http://www.ehs.ucsf.edu/Manuals/CSM/Csm_Chapter9.htm

17. DENTAL AMALGAM Dental amalgams are mixtures of mercury with silver tin alloy. Cal-EPA regulates them as ***chemical waste.*** Submit Chemical Waste Removal Form for its disposal.

*>If you watch and read carefully, you will see her accuse anyone
>who does not agree with all her views (uneducated as they may be) of being a
>liar.*

A total repeated lie.

The lies are from the posters own words, and has nothing whatsoever to do with disagreeing.

Lies are rampant here. When they are told and I ask for proof, Dr Steve, among others have NO proof.

*>When that does not get enough attention, she will resort to calling
>people "heifer", "Jew-boy", Atheist, queer, etc. Her behavior is certainly
>not civil nor compassionate.*

I am not here for attention, as far as the above, yes if needed I do stand up to ridiculous posters.

It should also be noted, Dr Steve says W_B is a naive guy.

While he speaks of Slat Lake City Landfill.

States it's a damn shame I didn't die.

and

Well said, mf, well said.

I have been called many names.

In fact from Sr Steve himself.

>will find that her claims do not make scientific sense.*

> *She claims to have
>been healed of neurological defects during the time that her bodily mercury
>levels would have been at their highest.*

No that what Dr Steve claims, I claimed.

He has been asked to show proof of this claim, he has none, but still repeats this lie.

NOWHERE did I ever say I was cured of anything.

<snip more lies>

>*Even those individuals who would like to see amalgam banned from use, find
>her posting methods and refusal to discuss any topics despicable.*

Proof of that lie is above.

>*Please recognize that there are far more people sensitive to Penicillin,
>latex, peanuts, and even to bananas than there are people sensitive to
>dental amalgam and the metals it contains. None of those materials have
>been banned, nor will they be banned in the future.*

Totally irrelevant.

Amalgams is the subject.

We already have partial bans, for very good reason.

The truth is mercury is being eliminated in ALL forms, dentists are the biggest polluters and care not about the environment.

The reason for this post, is Dr Steve got caught in his own trap.

After stating his many lies it is HE who refuses to discuss and can't answer my questions.
