The reason that *\_they\_* will always find a way is that there are so many of you (over 90 percent) blindly following the Brother Big Bill Gates way to PC nirvana. Until that changes, *\_they\_* will always be on your backs. (I AM TRYING NOT TO SOUND CONDESCENDING HERE.....like yesterday, but it IS alot like the proverbial lemmings following one idiot leader over the cliff...). But it IS frustrating that a superior OS (MacOS X) is and will always be smothered by one who has the \$\$\$ as the first priority, over workability or efficiency.

Go ahead...
