To complete the list,

Here is more .....

Fill the gaps in your healthcare – Daily Mirror 9th May 2001

"Have you ever suffered from a niggling – or perhaps not so niggling – health complaint, such as constant headache or neck pain, for which you have never identified the cause? If so, and you have tried conventional diagnoses, the answer could be right under your nose – in the fillings in your teeth." more...

Amalgam Removal in 1916

"From amalgam fillings, especially copper amalgam, the metal may be released into the oral cavity, or may in some form or other reach the dental cavity, and be absorbed by the circulation, giving rise to a chronic intoxication" more...

Mercury, ALS, Alzheimer's, PD, and apoE

This is another installment in my response to MScarabagg@aol.com who asked last fall whether ALS, Parkinson's, Alzheimer's and autism might be related. In this post, I will discuss evidence that a blood protein known as apoE may explain why some people (and some families) are more vulnerable to developing ALS and other diseases of the central nervous system (CNS) as a result of exposure to mercury.more...

Biologists Link Periodontal Disease, Clotting Factor, Heart Disease

Increased levels of the blood-clotting factor fibrinogen in persons with periodontitis have been found and identified, illuminating one pathway for the relationship between poor oral health and heart disease, say researchers at the University of Buffalo.more...

Results from the Boyd Haley Laboratory relating to toxic effects of mercury to exacerbation of the medical condition classified as Alzheimer's Disease

Research regarding Alzheimer's disease (AD) in our laboratory has been directed towards detecting aberrancy in the nucleotide binding proteins of AD post-mortem brain versus age matched control brain samples. Basic to all of our findings is the following observation.

Two very important brain nucleotide binding proteins, more...

#### Integrated Medicine Practice

This practice is proud to be associated with dental practitioners who carry out biocompatible dentistry. For them we do a screening service of three, integrated functional medicine tests which I will describe for you more...
