Hi JME! Youse wrote:

The embedded image ..... CEREC! (This is not available o nthe 'net).  
[image: <http://tinypic.com/b4au6o.jpg>]

The hyperlink to same:

<http://tinypic.com/b4au6o.jpg>

What is the difference? Are you saying that putting square brackets and "img" around a link will shield it from being stripped from the various web servers? And while we are at it: how do you make square brackets on a Windoze Box? I tried holding down the Windoze key and typing "()" but all it did was launch eighteen nuclear rockets towards the planet "Ralph".... :-/

Sorry about that....

Thanks  
SP
