What if it was a hematoma associated with the mental neurovascular bundle?
However, that shout of pain really reminds me of what I have read and seen
in lit review and in the undergrad clinic.

but for this
case, the
tooth was
mandibular,
correct?

That is what the patient

Re: Paging Dr. King

reported. The only thing I can say (until the OP responds) is that my memory of the case reports of NaHClO₃ extrusion were so awful—progressing to noma if memory serves—that the patient's complaint of having to take last Thurs. and Fri. off would have been followed by an even more serious story line.

Steve

Your thinking what I am. That stuff should be considered a WMD when it escapes from where it belongs. The instantaneous pain and swelling are tell-tale.

Dave

So you agree it's probably bleeding from the pterygoid venous plexus?

Steve

Nah, the bleach. Too rapid for the venous plexus.

Really? I saw the side of someone's face blow up like a balloon once after a maxillary infiltration—very striking, and certainly no bleach involved.

Steve
