Hello.

I have some questions regarding gastric / stomach cancer.

My dad (age: 50) was diagnosed with stomach cancer about a month ago. Two weeks after the diagnoses, he had a partial gastrectomy (65% of stomach removed). Tumor did not spread to other organs. However, 6 out of 6 lymph nodes were positive and cancer have made some lymphatic invasion (adenocarcinoma; Stage 3). Currently he is recovering from surgery and doing very well.

We are near Philadelphia. I would like to know if there are cancer centers that would be best for stomach cancer (since stomach cancer is kind of rare in the U.S.). If you know any excellent doctors / oncologists anywhere in U.S., I would like to know that.

Also, he will probably have to go through chemotherapy and radiation. But, I have also heard about immunotherapy / immunology and bio-therapy. If you know anything about some alternative / new methods, please let me know about that.

Thank you.

HR.
