We are a non-profit group of over forty University of Texas students whose lives have been touched by cancer. Our goal is to raise \$180,000 for the American Cancer Society, volunteer in hospital cancer units, and provide information while we cycle 4,500 miles from Austin, Texas, to Alaska.

If you would like to help us reach this incredible goal (we did it last year!) again, please visit
<http://www.texas4000.com>

If you would like to donate to our cause, please do so at the website, and reference me, Eric Schaefer, so I can raise my portion for the group.

Or if you can't donate, a kind word of support will keep us motivated. Look out for us as we bike through the western United States this coming summer!

~Eric Schaefer, Rider.
