Can anyone help me with some scientific research articles regarding urine therapy? Yes, i know... who needs them if the thing works? I am undergoing yogic studies and need as many articles as possible, for a research project on 'amaroli'. There are quite a few abstracts available, but (free) full texts are hard to get. They cost \$30 a pop, a bit much for self-funded research. So far i only managed to find 'Joseph Eldor, MD_Urotherapy for patients with cancer '. Any links or articles would be highly appreciated. All for a good cause...
