I am enjoying what is being discussed here.

I would like to share with you these thoughts from Orison Swett Marden about the oneness of all life.

The universe is one great kindergarten for man.
Everything that exists has brought with it its own peculiar lesson.
The mountain teaches stability and grandeur; the ocean immensity and change.

Forests, lakes, and rivers, clouds and winds, stars and flowers,
stupendous glaciers and crystal snowflakes every form of animate or inanimate existence, leaves its impress upon the soul of man.

Just participating in this group creates subtle links between us all.

Ancient wisdom for today's health problems –
