I'm not sure what Bachynsky was doing in Wayne PA, at the time of the original posting, but ironically there are 2 very close associations: the girlfriend of the young American doctor who died while under Bachynsky's care in Italy in July 2003 has a homebase there; also Joel, the lawyer who all the Bachynsky followers seem to despise, lives there.

The Italian authorities are still after Bachynsky for this young doctor's death. They hold him responsible. Had he called an ambulance to transport this young man to a hospital he would be alive today. He could have been saved. Bachynsky did not want authorities to know what he was up to — and that was his illegal use of DNP in Italy. And that is why he did not send him to a hospital to be treated, and thus saved.

DNP treatment in humans is not legal in Italy, was not legal in Italy at that time, was not legal in Switzerland when he was treating/killing people there; etc. He swindled and conned everyone.

Is he still your hero Roseanne Barrett, Kathy Boss, Ron Ball? You are standing behind a real loser.
