Lady have you been paying attention? On vertical transmission the CDC is wrong. this is NOT "I think" they are wrong. They are wrong wrong wrong. As far as STD there is plenty of evidence to suggest it is probable yet the CDC states there is no evidence. Once again, WRONG WRONG WRONG. I will be happy to repost everything which proves the CDC is printing inaccuracies. ITS A FACT, NOT OPINION.

LMAO THIS IS A GOOD ONE. Have you read silvermedicine.org?

Was it in there for an hour?, a day?, a second? People who print trash like this need their medical license pulled. Here is a good in-vitro trial with pictures.

<http://www.silvermedicine.org/colloidalsilverstudytexas.html>

OOOO RRREAAAALLLLYYY

ITS ALREADY AN ANTISEPTIC!!!!!!!!!!!!!!!

lady you need some education

PURE Bioscience, a NASDAQ traded company, developed and patented a silver citrate molecule, and markets products generally ranging from 30 PPM to 2400 PPM. Axenohl surface disinfectant products are sold to control bacteria, mildew and fungus, and are marketed out of Costa Rica.

Axenohl Pro Disinfectant, 2400 PPM, has been documented to kill residual bacteria and viruses 36 hours after a single application (dilution 1:128).

Most of Axenohl products are currently not approved for industrial or clinical use in the United States. However, recent approval by the EPA for "Critical Care" (a commercial disinfectant-fungicide-virucide), marketed by EnvirOx, L.L.C. of Danville, Illinois, contains Axen 30, and has resulted in official approved uses in some US States.

PURE Bioscience, NASDAQ traded, has shared recent plans to sell their water purification technology and pursue broader markets with their Axenohl product line, including seeking FDA approval through a

partnership with Therapeutics, Inc., based out of La Jolla, California.

Silver intake does not mean causation. Thousand take CS because they are on deaths door. To blame the eventual death on CS is dispicable. grow up. AGAIN this is SADSADSAD. No studies whatsoever on silver intake and death. Yet these fuckheads think they know the cause of death of a 71 year old near death man. whatever.

wrong product. the ppm is much too strong. CS is good against Lyme.
period. Some take the wrong product and turn grey. Do you want to put
the stop on silver research even though it could possibly halt the
Lyme epidemic? Is this your position?

Fine regulate it. I'm all for it. BEST GODDAMN ABX ON THE PLANET AND
NO ONE WANTS TO TEST IT, GO FIGURE. You as an activist are doing a
piss poor job on this. Get silver literate and go do something.

NO NOT THE FDA, please god if I can have one wish do not let
simpeltons use the FDA as a viable source. u g ok lets break it down
shall we.

I'm confused the curad bandaid states it kills all type of pathogens.
Seems kinda safe to me. Once again the FDA are complete idiots. FYI c
silver and silver are the same.

> *FDA is issuing this final rule because many OTC drug*

Did you hear the wording?"aware of any substantial scientific
evidence". Actually go back in time there is lots of evidence.
Phyllis if your relying on the FDA as information I suggest you do as
weisman puts it and quit. They are a joke. You are NOT lyme literate,
you screwed up already on test that cannot work. etc etc. You do have
a chance to redeem yourself. Get Lyme and silver literate. Inform the
community that we must assume a lyme epedimic is amongst us and demand
that research be done on how much ionic collodial silver can help in
this war. History (and I) will be judging you phyllis. Inaction will
produce thousands and thousands of more horror stories. I hope you
pray on this and do the right thing.

Feel free to e-mail me phyllis, you have your work cut out for you. I
hope you the best.
