I have been in your shoes and understand completely.

If it wasn't for my kids I would have offed myself a long time ago.

Nothing is guaranteed but it worked for me. CS is much more than pure anecdotal evidence!

My advise is demand that your doc get silver literate and start giving you infusions. It should be cheap. CS is cheap. Start with these references. educate yourself, then your doc. also you may want to start irrigation with cs before infusion so you can slowly handle the herx. As far as God, yea he's there he just has a slow time table concerning disease.

University of Northern Iowa Protocol

Colloidal silver solution is taken by the patient. Used as early as the 1800s and is currently considered a drug supplement
