Zip she ain't on "the island."

She's on her own freaking planet in her own freaking universe.

Yes her endless ranting drivel and babble fests are pollution of this and about a dozen other newsgroups.

If one thinks of it as pollution though, do you think it would be effective if people who enjoy the outdoors stopped doing so until polluters stop polluting?

Of course not.

Please keep posting, now more than ever we NEED some sanity.

Don't let kathLOON hijack this newsgroup (along with the dozen others).

Don't reward her selfishness. Just persevere. And don't worry: they're coming to take her away, the men with the butterfly nets, they're coming to take her away hee hee ho ho ha ha.

Specifically kathLOON has violated the terms of her release from her recent incarceration/institutionalization (she's a convicted felon and a documented psychotic paranoid schizophrenic munchausenizing monster mom) and likely to be more severely punished now that she's a repeat offender. She is a liar and fraud and exploiter of Lymeland NOT the hero crusader she proclaims herself as.

New charges are already in the works and she'll be gone again soon.
