Dear IRW2B,
Free Speech is a messy business isn't it?
But we better enjoy it while we can.
It can easily be construed that the signal-2-noise ratio here
is very heavy on the noise end... but MTN made some good suggestions,
and if you learn to use filters, if you so desire, that would help reduce
the "clutter".
MTN's Google search suggestion was excellent.
Many sick people post here,
so consistency, coherence, neatness and orderly content
would natch be in short supply...and misunderstandings are rife.
I just had one with Brent, but we're cool again.
