Are you an alien abductee?
58 common indicators of UFO encounters or abductions by alien beings
Indicators compiled by Melinda Leslie, edited by Mark Williams

Many millions of people, it seems, have had encounters with alien beings. Many of those people do not realize that they are having these experiences because of suppressed memories. Their awareness is limited to an occasional paranormal incident that seems to confuse them more than anything else. Some people are not ready to know for sure, others feel a deep need to know if they are involved with the beings. If you are in the later group, read on.

This is a list of 58 common indicators shared by most UFO abductees. It is based on known research on the subject and on personal findings. It has been compiled to help you determine if you are an abductee. Of course there may be other explanations for these occurrences and this is in no way an absolute means of knowing if you are an abductee. If you or someone you know does fit many of these traits listed here, PLEASE seek the help of a qualified researcher or therapist. This list is not in any particular order.

- Have been paralyzed in bed with a being in your room.
- Have unusual scars or marks with no possible explanation on how you received them (small scoop indentation, straight line scar, triangular marks, scars in roof of mouth, in nose, behind or in ears, etc.)
- Have seen balls of light or flashes of light in your home or other
