Like silver, I don't know anyone who has ever been cured by Rife, but I know people who have gone off on alternative tangents and then say, "Antibiotics don't work!" because they weren't cured in a year and then they go on Rife or silver or herbs and they come crawling back going, "WHY did I go off antibiotics>?" because they get really bad again and THEN they say, "YOU got so much better on antibiotics but I didn't!" when they didn't even STAY on abx continuously for ANY length of time and I say over and over and over to the people who do this who seem to do this over and over and over, "If you STAYED on antibiotics instead of going off and on maybe you would get better too!" Because if you look at our local group the people who have done the best and are doing the best are those who did:

1. IV Rocephin for Lyme OR strong orals or IM (whatever doc thinks is appropriate)
2. treated all coinfections
3. stayed on abx longterm

Period. I am talking chronic Lyme, people sick for years. If you're in our local group and you did those 3 things you are doing great. It is quite evident. It is a pattern. It is an equation for health. The people who come in, don't pay attention, don't listen, go off abx one week and back on 4 months later and then whine about not getting better- agh!!!!!!!!!!!!!!!!!!!! Frustrating!!!!!!!!!!!!!!!!!!!! And often the excuse/reason for going off abx is to try silver, try Rife, try this, try that, and people can spend YEARS doing that!!! Years!!!! And people get really bad again. I often think it is because they are so sick they can't hear clearly, can't THINK clearly enough to notice what is so simple an equation, what is so evident in front of them!!!

.
