National White Collar crime center:

<http://www.nw3c.org/>-----

The FBI plays two very important roles in cyberspace. First, it is the lead law enforcement agency for investigating cyber attacks by foreign adversaries and terrorists. The potential damage to the United States' national security from a cyber-based attack includes devastating interruptions of critical communications, transportation, and other services. Additionally, such attacks could be used to access and steal protected information and plans. The FBI also works to prevent criminals, sexual predators, and others intent on malicious destruction from using the Internet and on-line services to steal from, defraud, and otherwise victimize citizens, businesses, and communities.

Amazingly stupid KathLOON cyberterrorist and LIAR!

The mission of the Cyber Division is to:

coordinate, supervise and facilitate the FBI's investigation of those federal violations in which the Internet, computer systems, or networks are exploited as the principal instruments or targets of terrorist organizations, foreign government sponsored intelligence operations, or criminal activity and for which the use of such systems is essential to that activity;

form and maintain public/private alliances in conjunction with enhanced education and training to maximize counterterrorism, counter-intelligence, and law enforcement cyber response capabilities;

and

until such time as a final decision is made regarding the future role and location of the National Infrastructure
