Ed, hand over the Nerve Agent information or we'll refer you to the Colchester, Connecticut, Police Welcoming Committee:

"Expose one Connecticut Murder for hire plot, cops hire thugs to kill you. They fail when you are stabbed 13 times, you wake up in the hospital, only to be arrested for having been stabbed. Does this sound like the Twilight Zone? No, it gets better, cops and the FBI now can state they have the right to confiscate the evidence of police and FBI misconduct and illegal behavior in that they commit in the process of violating a citizens rights, saying they have "Homeland Security" authorization to do as they please and complain and you can be arrested with no hearing, release date, and no way out.
I talk with one of the Undercover Murzins, here."
