Subject:

NIH's Edward McSweegan illegally exposed the fact that the US Navy
illegally obtains NERVE GAS

Date:

Saturday, December 02, 2006 6:44:20 PM

Re: Sweeg and the NERVE AGENTS....Defrauds the US Navy in letter to Barry Goldwater

When he was harassing the Navy out of their vector borne diseases funding?

Did ya all catch that?

http://www.actionlyme.org/GOLDWATER_LETTER.htm

McSweegan is NIH's self-described "awfully damned intelligent," "hung like a horse," "DO-NOTHING" "scientist," who makes death threats to women in Europe and stalks and harasses Lyme victims anonymously on the newsgroup, using a remailer to hide his e-address: There can never be a vaccine for Lyme disease, (despite McSweegan's delusions of grandeur), because Lyme disease is are relapsing fever borreliosis.

This is a Conspiracy to 1) Defraud and 2) Slander the United States, and its Navy, 3) Reveal sensitive US bioweapons information, and 4) Render the US population disabled through deliberate scientific fraud, a monopoly on vaccines and testing, and medical negligence:

NIH's "NO-WORK" Ed McSweegan corresponds with Senator Barry Goldwater in 1986, explaining how the Department of the Navy is incompetent, and that the Tick Borne Diseases funding and patent rights should therefore be given to his criminally insane friends, including SmithKline (you will see SmithKline mentioned below, in the Navy's response) and Yale.. These people later committed a fraud against the United States, as IDSA is now doing, with their definition of "Lyme Disease" and their statements as regards congenital infection. Now, in place of SmithKline, McSweegan is helping Baxter defraud the United States with their new OspA vaccine. Lyme is a borreliosis- a permanent brain and nerve infection, that is STEALTH, and not primarily an inflammatory disease.

Gulf War Illness and nerve agent (mentioned by McSweegan in his criticisms of the Navy) antidotes on MedLine Gulf War Illness and mycoplasmal infections

McSweegan trashed the US Navy, the NIH, the Lyme disease Foundation, the FBI,

and chronically stalks and trashes people who have Lyme disease, He actually stalks us, and attends rallies, like the one in New York, at the Pierre Hotel.

That would be because the Lyme vaccine was all his idea, and it was bogus, never worked, hurt people, and he was involved in the cover up. McSweegan and "Biocrimes and Misdemeanors"– criticizing the FBI McSweegan's Delusional Psychosis talking:

"As a graduate student twenty years ago, I had a departmental recruiting poster

tacked up on the wall next to my desk. It read, in part, "If you are curious,

patient, and awfully damned intelligent, consider a Ph.D. in microbiology." In

1984 a degree in microbiology seemed like a good idea."

Having

grandiose delusions about how brilliant he is... he went on to do this:
