An estimated 46 million adults in the United States reported being told by a doctor that they have some form of arthritis, rheumatoid arthritis, gout, lupus, or fibromyalgia.

One in five (over 21%) adults in the United States report having doctor diagnosed arthritis.

In 2003-2005, 50% of adults 65 years and over reported an arthritis diagnosis.

By 2030, an estimated 67 million of Americans aged 18 years or older are projected to have doctor-diagnosed arthritis.

This is the data about Arthritis collected by different agencies from United States of America. One thing in this Data is important to note that this is only from U S, data from all over the world may be more shocking to know more click:
