- > *never revolted to that type of system.*

Take it easy here ... one minute it's totalitarian rule and one minute it's socialist subserviance ... it can't be both ... in fact it's neither. There was this minor event in history called the British Revolution that happened a few years before the American Revolution and created something this little thing called a constitutional monarchy. If you're not familiar with it check it out ... you'll probably get a chuckle. The picture of the Queen is just that ... a picture. When the boys in Boston had their Tea Party, they were revolting against the taxation policies of the British Parliament on colonial America. Got nothing to do with the King (he was probably too busy relaxing to be totalitarian). I get this impression that you like to associate Canada (or I guess the you've got thing against the rest of the Commonwealth too) with all things archaic, and its people Medieval serfs or something. Why we just elected a prime minister, I think. Oh yeah we did.
