I am no longer a regular here on these ngs because my web site became independent from the need to post here years ago. :)

<http://naturalhealthperspective.com/>

It has a Google pagerank of 6/10 and a Alexa traffic ranking of 715,000.

I am in the process of making a few slight changes to my web site design that should boost my Google pagerank to 7/10 and dramatically increase hits, of course.

I connected the dots years ago. Now, I am filling them in with color. :)
