You have got to be kidding!

So you are saying that the Pharma strategy to charge US citizens extraordinarily high mark-ups on prescription drugs is really a system designed by the US regulatory agencies and Pharma to keep drugs out of the poorer peoples hands in order to protect them from the harmful effects of the toxic drugs? And the cheaper drugs in Canada are there because the Canadian govt has sold out and they willingly allow the drug manufacturers to poison the populace and they conspire to make them cheap enough so that everyone can afford the prescription poisons?.

Are you on drugs?

TC
