"You cannot tell me that eating meat from an animal who was fed gm grain is harmful."

Sure someone can, can you show it is not?

"But I can tell you that if you consume ANY soy you will have this much risk compared to not consuming ANY soy:"

Sure you can, for one study in a rat model, if it is valid for animals in general, including our meat sources and we humans, we should see the same pattern on a widespread basis; do we?

.
