I took it for my back when I threw it out. Honestly, I don't remember it being much help for my back, although it did make me nice and sleepy. I suppose I could see it benefiting your CP, but only time will tell; everybody reacts to different drugs differently. I was taking it along with Aleve, and one or the other (both?) gave me an allergic reaction and I had wicked bad hives. Not looking to repeat the experience. :^)

As a side note, I had great luck with a cycle of Flomax. As soon as I stopped taking it, my symptoms returned, but for the month I was on it, it worked well.

Rob
