Now the visitors to your site can rate and submit their feedback to ANY content on your website and in the process increase interaction from your visitors, acquire genuine contents for your website, increase search engine reputation and give your visitors a means to express themselves. In one line: Feedback and Rating Script is a script that adds feedback, review and rating feature to any website running PHP scripts. The power of this script lies not only in its ease of integration but also in the details of customization that are available from the web based admin area.
