I have start stop and I have pasted the supported file formats. When I can't play a file I use the free version of aware audio to convert files to wav...it supports just about everything.

The Start Stop plays all of the Standard .WAV, .MP3 and .WMA formats:

The Start Stop plays ALL of the Standard .WAV formats (approximately 20 "flavors")

TrueSpeechT compressed .WAV format

GSM .WAV

ADPCM .WAV (popular for Courtroom recording systems)

.MP3 audio format (popular for music and speech)

.WMA up to 44,100 hz CD Quality Sample Rate

Plays Music Audio CDs (Compact Audio Discs) –New for Version 9.2

PLUS, Start Stop plays these non-standard digital dictation formats:

Digital Dictation Systems and Call-in Systems

Digital VoiceT call-in system files (e.g. .VOX and .WAV)

DictaphoneT Digital ExpressT

Dictaphone BoomerangT and .AUD files

"PlayAll" T BCB TrueSpeechT files with non-standard embedded headers

DVIPST (VOX 6KHz sample rate, 4-bit, ADPCM)

Crescendo

DialogicT based telephony systems

BVP Computers

Re: Sony Digital Files

sci.med.transcription: Re: Sony Digital Files

Specialty VOX Formats, including separate selections for

"Bitescribe" 8 KHz PCM Mu-Law,

DVIPST OKI/Dialogic 6/8 KHz VOX 4-bit ADPCM

VOX A-Law formats.

Courtroom Recording Formats

ProCatT

Most popular courtroom audio formats

Digital Recorders

Sanyo Digital Recorders

OlympusT .DSS (Used with DS-320, DS-330, DS-1000, DS-2000, and DS-3000 Recorders)

Lanier CquenceT M³ Mobile Digital Recorders (.DSS format)

Voice-It T Mobile Digital Recorder's .SRI format

DictaphoneT Walkabout TourT Digital Recorder

UHER DH-10 Digital Recorder TrueSpeechT

Plus plays specialty digital audio formats

CCITT Stereo A-Law

Evercom & T-Netix call monitoring formats

Mu-law and A-Law (SunT Microsystems) non-standard .WAV files

Creative SoundBlasterT .VOC (Version 1.2)
