I'm not all that familiar with Word, but I'm finding that I can pull out the same line counts in DQS that I could in WP51 with ST after only a couple of months of using the software. There are a few things that are a pain in the neck with adding demographics, but it's really no worse than what I was using before. I'm not sure why people find DQS to be so difficult; at least, it hasn't been for me.
