Well, the seniors of today were the protesters of the 60s!! :) Heaven knows the young folks of today, don't seem to get enough of a rip to protest anything!

I personally think there is such an uprising over this that there will be serious changes. I have protested to my HMO—I just hope others who are hurt by this so-called drug plan benefit will do the same. If enough

people

yell loud enough somebody is going to notice! At least I hope so.

I know what you mean. I think there's a lot of pressure on the President right now to improve the current plan since Part D has hit some snares...recently aarp urged the President to re-negotiate drug prices with the pharmaceutical companies. That makes sense to me...I'm sure we could work on getting better prices.

Do you think the Rx plan will be scrapped?
