"They probably outsource due to cost but at what cost to the patient's records?"

Kim, I very purposefully brought up both offshore outsourcing as well as speech recognition technology to the reporter who interviewed me as specific examples of how the importance of what we do is being marginalized by the pressure to cut costs. I used your words almost verbatim to warn about the dangers of trying to save money by eliminating the safety net we MTs represent. Unfortunately that part didn't make it into the news story.

Jay
