Oh, I'm not going to lose AOL even if I do finally get Comcast up and running. Sorry if some of you don't like it, but I do and prefer it to others I've tried, PeoplePC for one. The cost is negligible for what I get with PowerTools, which I do NOT want to be without.

As far as some stranger coming into my house being a problem, it is and that's the end of it. Everyone has a phobia of some type or another, and that's mine. I'm working on it, but I have to do it at my own pace.

ed, what the heck is ethernet? The modem pamphlet looked like I have to go inside the computer and add something. Maybe I'll get this feature when I buy a new laptop later this year.
