iTechArt Group – Custom Software Development and Offshore outsourcing Company

<http://www.itechart.com/>

Offshore custom software development company iTechArt – Web site and Content Management Solutions development, CMS consulting; Ektron, Drupal and DotNetNuke

iTechArt Group provides high quality custom software development services and offshore software development. On December 2006, iTechArt Group became an authorized Microsoft Certified Partner. This means that our company has been recognized by Microsoft for our vast expertise and authorized to custom software development; provide IT service consulting and custom business solutions.

Custom Software Development and Offshore outsourcing Company iTechArt has worked together since 2003 to design build and deliver .NET Web Content Management software solutions that help clients meet their strategic objectives. We are agile oriented development partner able to consistently deliver solid results.

iTechArt software development team assembles specialists in the development of custom software applications and offshore software outsourcing services.

Working concepts of our company are based on proven approaches and international standards used for custom software development such as Capability Maturity Model Integration for Software Engineering (CMMI-SW). In the same breath we have our own standpoint on software development process management which is fully effective and comprehensible for our clients.

iTechArt offers software development in the next main directions:

1. Custom Software Development (Offshore outsourcing for worldwide based software development companies.)

2. Software Development for Digital Signage (Media content development and remote displays / information kiosks Web-based software application management.)

3. Web Site Development (E-commerce solutions, CMS/DotNetNuke/Ektron/Drupal, Web 2.0/PHP/MySQL/AJAX, Flash/Action script/Flex and many more.)

4. Offshore Development Center (Dedicated development team of software developers. Our offshore development centers operate as an extension to clients' existing software engineering business.)
