This has been asked before, but I've forgotten the names of the free news servers. I have been using Google Groups since changing my ISP to MSN, but either the activity on SMT is very slow now or Google isn't getting them all.

Thanks!

Neal

For a free backup news *server*, I'm using:

news.datemas.de

I'll second that suggestion from Ed. Thanks again, Ed!

Marsha/Ohio

You're very welcome.

ed
