Thanks to those of you who responded about "the" chair. I also contacted dealers of the chair for advice. The bottom line is that I really, really need to make a trip to San Antonio to try one out.

Melinda voiced the same concerns I have regarding this chair and that is the mesh seats. I'm not sure it would be comfortable. She also mentioned the chair she had used with the tractor seat. That is the way the Relax the Back chair I had was made and I always felt it was the main reason the chair worked so well. It also had a high back that gave my back and neck such good support.

I really hate to make a trip into San Antonio because of all of the highway construction but guess I gotta do it. Amazing how spoiled you get to this small town living after having lived in Houston for so many years, but I really hate to make the drive.

Thank again.
