Neal

My experience is limited to Metroscript, which Andrea is using. That company handles the website, backup systems, etc. The MT has a toll free number her doctor clients can call to dictate, and then the files are available to the MT or her subcontractors via the website. I have done some sub work of this particular TASP (I think it stands for Transcription Application Service Provider – but I might be wrong). If I recall correctly, you pay a minimum fee a month, which isn't much – but actual dictation time comes out of that and I do not believe it involves any long-term contract. Once you're set up with an account as an MTSO and get a new client, you can add him or her yourself. There may be some cheaper – but sometimes cheaper is not better, right Andrea? LOL
