TINY BABIES/TOXIC FLUORIDE See below...

Attn: Disneyland DA Tony Rackauckas ([tony.rackauckas@da.ocgov.com](mailto:tony.rackauckas@da.ocgov.com)): I am again reporting a massive toxic chemical child abuse crime. See the very end of this post.

Have you done anything yet?

KIWIS REJECT FLUORIDATION (Rotorua District)

YAY!

Go Kiwis! See Prof. Connett's Fluoride Action Network Campaign Bulletin #76 below.

ON A PERSONAL NOTE...

Like most people, I was ambivalent about fluoride...

But now things have changed...I've read *The Fluoride Deception* by Christopher Bryson...

My focus has been PREGNANT WOMEN and stopping a bizarre birth practice: OBs are knowingly closing birth canals up to 30%; see the postscript.

But something equally bizarre is happening BEFORE birth...

TINY BABIES/TOXIC FLUORIDE

Bureaucrats – mostly in America – are deigning to dose whole populations including pregnant people with tiny people growing inside them...

"The devil is in the dose," say toxicologists – and tiny people growing inside pregnant women are likely getting some extra fluoride "devil" attacking their enzyme systems...

sci.med: Tiny babies/Toxic fluoride (also: Yay! Kiwis reject fluoridation in the Rotorua District)

The fluoride game was "don't look for the devil." Well, Phyllis Mullenix, PhD finally looked for the devil and fluoride is so toxic – well – even at low drinking water doses there is evidence it is toxic to the central nervous system. See Bryson C. *The Fluoride Deception*. NY: Seven Stories Press. 2004.

The euphemization of fluoride – we aren't even aware that it is THE air pollutant – and our "consent" to be medicated with the toxic waste via drinking water – was manufactured/engineered by polluters aided by Sigmund Freud's nephew Edward L. Bernays. Again see: Bryson C. *The Fluoride Deception*. NY: Seven Stories Press. 2004.

INCREDIBLE FACT #1: We are injecting toxic phosphate fertilizer WASTE called hydrofluorosilicic acid into our drinking water.

INCREDIBLE FACT #2: America's Environmental Protection Agency/EPA and National Academy of Sciences/NAS in effect admit that 3% of us drink enough water that if our water contains HALF the "permissible" level of the toxic stuff – "crippling skeletal fluorosis" can occur in 10 years.

This EPA and NAS info comes from *The Fluoride Deception*, the new book by Christopher Bryson, cited above.

For my summary of Christopher Bryson's skeletal fluorosis discussion...
