Risk:

1. Wasting your life for an afterlife that most likely will never come.

2. Becoming enthralled by religious fanaticism. You only have to look at people like George W. Bush to see how religion can poison a persons mind.

3. Shiva might be less then pleased that you worshipped Christ instead of her.

sci.med: Re: will a LDL > 70 kill me?

4. Zeus will definitely not like your decision for Christ.

5.–100000. The same picture with at least 100.000 of other gods and ghosts and other supernatural entities.

Benefits:

Ease of mind, but it comes at a heavy price.

> *(2) Reject Christ.*

> *Risk: Eternal separation from God. Eternal torment of your soul by satan.*

>

> *Benefits: Nothing.*

Risk: None.

Benefits:

Live your life as you like and as your conscience tells you and not as some religious fanatics tell you.

Care about other humans rather than about entities that don't exist.

> *Again, one has to conclude that those (ie you, Carey, Bob, George, Frank, Hawki,*

> **logically*.*

This is not really a decision. Just as it is not really a decision of mine that I believe that $2 + 2$ equals 4. You

> *will escape satan's rule and torment of your soul after you die.*

All these threats with torment are enough to render all this talk about God's love for humans meaningless. That is, they would have done so, if they had not been meaningless in the first place.

And now for something completely different.

Andrew, i would like to know why you crossposted this thread to misc.writig and rec.food.cooking.

I understand that this is a choice of yours and I don't deny you the right to make this choice. Only thing is, I would like to understand the rationale behind this choice of yours.

Thorsten
